

MOBILIZATION STRATEGY

GOAL: By the end of 2020, Cuyahoga County's 2015 infant mortality rate (IMR) of 10.5 will decrease to a 6.0 IMR by mobilizing the community through partnerships and a unified strategy centered on reducing racial disparities, addressing extreme prematurity and eliminating sleep-related infant deaths.

2017-2020 FYC PRIORITIES

FYC ACTION TEAM LEADERS

FYC Collective Impact 2020 GOAL

By the end of 2020, Cuyahoga County's 2015 infant mortality rate (IMR) of 10.5 will decrease to a 6.0 IMR by mobilizing the community through partnerships and a unified strategy centered on reducing racial disparities, addressing extreme prematurity and eliminating sleep-related infant deaths.

Develops an overall systems view on reducing infant deaths for collective impact and priority areas. Advance shared responsibility and accountability system. Uses data to identify and prioritize efforts. Aligns work of individual agencies to FYC unified strategy. Secures funds for innovation and sustainability for collective impact and priority areas; ambassadors to FYC collective mission.

FYC Executive Committee
FYC Community Action Council

Builds public will by authentically engaging all community stakeholders to take action on unified strategy and activate policy change.

FYC Engagement and
Public Policy Committee

Creates communications tool kits for different audiences so the public develops a common understanding of infant deaths and the action(s) required to reduce infant deaths.

FYC Communications
Committee

Reduce Racial Disparities 2020 GOALS

By the end of 2020, our community will reduce the baseline African American to Caucasian infant death disparity rate of 6.7 by 50 percent. This will be accomplished through an action plan addressing structural racism. The plan will be developed through a better understanding of the roles race and maternal stress play in infant deaths and learning from families who have experienced pregnancy and infant loss. Our community is striving with urgency that there be no racial disparities in infant deaths by 2025.

FYC Action Team: Execute an awareness campaign and employee training campaign to address biases in the workplace that are negatively impacting maternal and child health outcomes (include leaders and Diversity and Inclusion Officers from health, education, employment, housing and public safety).

Margaret Larkins-Pettigrew,
University Hospitals,
Adrianne M. Crawford Fletcher, CWRU, and,
Jasmin Santana, Cleveland City Council
Funded: \$19,170

FYC Action Team: Gain a further understanding from African American families that have experienced a loss.

Sabrina Roberts and Tracy Carter
Funded: \$405,000

FYC Action Team: Lead research efforts to better understand the roles race and maternal stress play in infant deaths.

Angela Neal Barnett, Kent State University,
and Christin Farmer,
Birthing Beautiful Communities
Funded: \$20,000

FYC Action Team: Coordinate an integrated equity model with housing, education, health care, and public sector leaders to address the link between structural racism and social determinants of health.

Dr. Arthur James, Infant & Maternal Health
Expert; and Margaret Mitchell,
YWCA Greater Cleveland
Funding TBD

FYC Action Team: Establish an academically-driven research and development effort to gain a better understanding of systems issues impacting African American infant deaths and what must be done to remove structural racism.

Lead TBD
Funding TBD

Address Extreme Prematurity 2020 GOAL

By the end of 2020, our community will go from a 2015 preterm birth rate of 14.9% to the March of Dimes target rate of less than 10 percent by launching Learning Circles with birth hospitals, improving access to 17-P, increasing public awareness of birth spacing guidelines and access to LARC, increasing enrollment in evidence-based CenteringPregnancy® and addressing social determinants that are impacting premature death rates and preterm birth rates. The number of expectant mothers receiving services from doula birth workers, home visiting workers and community health workers will be doubled.

FYC Action Team: Collect data and launch Learning Circles with local birth hospitals and researchers/experts to identify and resolve issues contributing to infant deaths.

Rita Horwitz, Better Health Partnership
Funded: \$481,313

FYC Action Team: Work with ODM, ODH, The Academy of Medicine, Ohio Perinatal Quality Collaborative and local Ohio Equity Institute to improve access to eligible 17-P pregnant moms by educating home visitors on 17-P and link, align and coordinate home visiting, fatherhood programs and faith-based programs with Centering Pregnancy®, prenatal care clinics and birth hospitals.

Lisa Matthews and
Angela Newman White,
Cuyahoga-Cleveland Ohio Equity Institute
Funded by OEI

FYC Action Team: Work with providers to increase public awareness of birth spacing guidelines, implement One Key Question, and improve access to LARC. With March of Dimes, ensure Cuyahoga County has resources to be a leader in prematurity research.

Melissa Federman, Center for Community
Solutions, and March of Dimes
Funded: \$14,162

FYC Action Team: Increase the number of expectant mothers being served in a CenteringPregnancy® Model.

Celina Cunanan and Alison Tomazic,
Cuyahoga County
CenteringPregnancy® Coalition
ODM 2017-2021 \$5.4M

FYC Action Team: Address social determinants impacting expectant parents by serving over 4,000 pregnant mothers annually with results-driven interventions that address housing insecurity, employment, education, nutritional needs, and early access to prenatal care and postnatal care.

Faith-based entities, nonprofits, prenatal
care providers, Invest in Children,
Bright Beginnings, ODH and ODM
ODM 2017-2021 \$6.4M

Eliminate Sleep-Related Deaths 2020 GOALS

By the end of 2020, our community will reduce the number of sleep-related preventable infant deaths from 27 in 2015 to less than six by executing a Community-Wide Behavior and Culture Change Initiative that follows the ABCDs of safe sleep for infants (Alone, on their Back, in a Crib, Don't smoke). This will be driven by parents and grandparents who have lost an infant to a preventable sleep-related death leading a community-wide behavioral modification intervention and activating faith-based organizations, media outlets, neighbors and over 10,000 employee-driven community sleep ambassadors.

FYC Action Team: Model the MetroHealth employee sleep ambassador program throughout the county. Hire parents and grandparents that have experienced a sleep-related loss to drive the messaging campaign and lead training. Work in partnership with faith-based organizations.

Rita Andolsen, The MetroHealth System;
KeyBank Leadership; K. Michael Benz
Funded: \$470,000

FYC Action Team: Promote use of free State of Ohio Quit Line and Support Tobacco21, an effort to limit tobacco sales to persons age 21 and above.

Terry Allan,
Cuyahoga County Board of Health
Funded: \$60,000

FirstYearCleveland.org

Our Vision: Every baby born in Cuyahoga County will celebrate a first birthday.

Our Mission: To mobilize the community through partnerships and a unified strategy to reduce infant deaths and racial disparities.
